

Ben Tennyson continues his search with the help of the Omnitrix, his cousin Gwen, and his former rival Kevin. The trio begin vol. 2 in search of Ben and Gwen's cousin Ken (yes they rhyme) and stumble upon their Grandpa's trail and yet another alien conspiracy to take over the Earth but that's only the beginning.

While I am still disappointed with the releases of the Ben 10 Alien Force for their meager collection of episodes per volume their almost bleak bonus features Vol. 2 does offer a pretty cool bonus feature in DNA of a scene. IN the bonus feature kids get to watch a scene from one episode that mixes live action with sketches and even pairs dialogue with snapshots of the actual script for the episode. Its short but it's a pretty exciting bonus feature that will get kids excited and maybe interested in learning to draw. Other then that this volume gets another low grade for simply being bare carrying four episodes with a complete run time of 88 minutes. Cartoon Network...you could do so much better, especially during these trying economic times. Here's still hoping for a complete season one box set with more bonus features. Enjoy.
